Essentia

ONE solution to a perfect SKIN.

Product Sheet

Permeation-enhancing actives, it contributes to scleroproteic fibres formation, it exerts a repair and vivificant action on the skin, it accelerates healing of wounds, great sustantivity of skin proteins. It activates the generation of collagen, restructuring the skin and at the same time ensures a remarkable whitening effect and improvement of the skin tissue (pj. for photo-aging damages) along with extraordinary hydrating properties which is the key factor to see immediate results.

Synergistic system based on a balance of action-reaction of the ingredients from the inside to the outside.

Indications

Anti-Aging | Stretch Marks |Hyperpigmentations | Skin Repair |

Composition Main Actives - serum complex in ampoules

GRUNDELINE COMPLEX

(faex extract, glycine soja germ extract, pisum sativum extract ,vicia faba seed extract, phaseolus vulgaris extract, aminobutyric acid, hydrolyzed serum protein (hexapeptide+octapeptide), tocopheryl acetate, ascorbyl palmitate,retinyl palmitate, B-group vitamins)

DERMO-REGENERATING COMPLEX

(vegetal RNA, panax ginseng root extract, ginkgo biloba leaf extract, hydrolyzed collagen, hydrolyzed elastin, humulus lupulus extract, silybum marianum extract, thymus extract, adenosine triphosphate, allantoin, placental protein, AHA)

HYDROACTIVE ANTIFLACCIDITY COMPLEX

(sodium pca, urea, aloe barbadensis extract, opuntia coccinellifera flower extract+ ceratonia siliqua seed extract, panax ginseng root extract, extract, hydrolyzed elastin)

DEPIGMENTING COMPLEX

(hibiscus sabdariffa flower extract, arctostaphylos uva ursi leaf extract, kojic acid, AHA)

Mode of Action

"Desert Rose," NERIUM OLEANDER, thanks to its actives (oleandrina, neriatine, adinerine, l-strofantina, flavonoids and k vitamin), presents astonishingly healing properties, such as: • Help for skin conditions such as eczema, psoriasis and dermatitis • Natural support for healthy blood sugar levels • Increasing healing times for wounds, when applied topically • Powerful immune-system stimulator.

SODIUM PCA (sodium L-pyroglutamate) occurs naturally in human skin and is responsible for water-binding properties to the cells. important component of this intracellular matrix, preventing our skin cells from losing water and drying out. It reduces inflammation in our skin, by preventing surface irritation from becoming too serious. Highly water-absorbent. Well- know as skin-penetration enhancer.

VEGETAL RNA has a regenerative power, extraordinary ability to smooth the skin, stimulate the growth of new cells, smooth wrinkles and simultaneously strengthen and reactivate the deep dermis. It's present in all cell types and participates in the synthesis of the PROTEINS present into the formulation (Hydrolized Rice protein, Hydrolized Collagen, Hydrolized Elastin, Placental protein) that form the body, assist in the production and development of collagen and elastin fibers.

Product Sheet

SODIUM HYALURONATE Is a physiological component of the intercellular matrix of connective tissue that fills the space enters cells and collagen and elastin fibers. It is highly hydrophilic. Applied to the skin, hyaluronic acid forms a thin transparent invisible viscoelastic film, which helps the skin retain its softness, elasticity and tone, promoting its natural protective mechanism.

ACIDS COMPLEX (AHA+kojic+GABA) ALPHA-HYDROXY-ACIDS (citric acid,malic acid, glycolic acid, tartaric acid, lactic acid) are natural substances found in many acid fruits and their primary role is to reduce the thickness of the hyperkeratotic stratum corneum with consequent stimulation of the basal layer and promote the synthesis of dermal biomolecules (glycosaminoglycans), with the disappearance or reduction of shallow wrinkles in aged skin or skin abused by solar radiation. The continuous use of AHA • improves the appearance of skin with superficial wrinkles • helps control acne and oily skin • increase the plasticity of the stratum corneum • increase the synthesis of collagen and glycosaminoglycans • reduces skin pigmentation problems. KOJIC ACID has antiradical and anti-inflammatory activity, and is a potent inhibitor of tyrosinase activity. GABA (aminobutyric acid) inhibits muscle tension reducing wrinkles of expression.

"GLUTHA-VIT" COMPLEX - mother of all antioxidants, master detoxifier, GLUTATHIONE is a very simple molecule that is produced naturally all the time in your body. cells are able to synthesize their own glutathione from three amino acids, glycine, l-glutamic acid and l-cysteine. It absorbs the free radicals and melanin generated by UV radiation and drives them out of the body while it forms an anti- radiation film to fight against UV damage • antioxidant •detoxifier • skin whitening • it recycles other antioxidants like VITAMIN C that stabilizes and strengthens collagen fibers • boosts gluthatione's properties and regenerates VITAMIN E (tocopherol) • complementary action with GLUTHATIONE as strong anti-oxidant effect • stops the free radicals' chain reaction • repairs skin tissues and enhances the formation of new skin cells of the outer layer. B-GROUP VITAMINS (B1, B2, B3, B5, B6, B7, B9, B12 and inositol) enhance beauty by promoting healthy skin by counteracting damage caused by free-radicals. Each has a distinct function but equally relevant and synergistically effective • help to regulate skin's pigment production • promote faster healing of skin wounds.

VIT. A (retinol)+PEPTIDES COMPLEX (ARGIRELINE® hexapeptide8+SNAP-8 octapeptide-3) complementary action, imitating the natural mechanism of enkephalin.Inhibits SNARE COMPLEX formation - slightly destabilized, the vesicle can not release neurotransmitters efficiently, result in muscle contraction attenuation, preventing the formation of lines and wrinkles - and CATECHOLAMINE release, resulting in the reduction of the degree of existing facial wrinkles and demonstrated effectiveness against their development • reduction of the depth of wrinkles in the forehead and around the eyes up to 63.13%.

PANAX GINSENG contains a large number of phytonutrients (ginsenosides) • skin cell regeneration by increasing oxygenation to skin cells • boosting blood circulation as well as detoxifying the blood • boost skin-firming collagen • skin whitener • promotes wound healing.

ALOE BARBADENSIS effectively stimulates proteolytic enzyme action in skin tissue, stimulating fibroblast cells that produce collagen • protects the skin from UV damage • scar reducing and wounds healing properties • anti-inflammatory action.

GINKO BILOBA • vaso-regulator • activates microcirculation.

METHYLSILANOL MANNURONATE (ORGANIC SILICON derivative) binds moisture in the epidermis • strong anti-oxidant • tensor, restructuring and firming effect, essential for the formation of collagen.
